

Audio Visual Logistics – David Penglase

David enjoys meeting and working with the audio-visual professionals who are so important to the success of the conference.

The checklist below is fairly standard, however, please let David know if there is anything on the list that will not be available ... David can be as flexible as you need him to be to make your event successful.

- Microphone headset or Wireless Lapel Microphone (David's preference is ***not*** to use a hand-held microphone).
- Screen projection for slideshow
- For the Slideshow – David's presentations are interlaced with both audio and occasionally video segments.
- Slide deck is designed in PowerPoint 16:9 widescreen format.
- Hand-held Presentation Slide Changer ('Clicker')
- Small table back of stage (usually behind lectern) where possible, for presentation props/audience gifts.

David will have his Microsoft Surface Pro (with VGA connection) plus a backup USB of his presentation slide deck should they be required.
